Office Action Summary	Application No. 10/688,314	Applicant(s) TUCKER, MARTIN S.	
	Examiner John P Lacyk	Art Unit 3736	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3736

1. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 8 appears to be a dependent claim but fails to define what claim it is dependent on.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 further recites a frame in the housing that pivots relative to the housing, however it appears that (similar to claim 2) the frame should be connected to the motor and linkage to clearly show that they are connected to the frame and pivoted because of the frame pivoting or claim 3 should depend from claim 2.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 8, 10, 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nickell in view of Padgett.

Nickell discloses a stimulation device having a housing, a projecting member that is pivotable in the housing and a slot through the housing which the projecting member extends at least partially through. Nickell discloses the claimed device except for the use of a stimulating device that provides reciprocal motion of the projecting member. Padgett discloses a stimulation device and teaches that it is well known to provide a stimulating member that uses a reciprocating motion to stimulate the user. Therefore a modification of Nickell such that the projecting member provides a reciprocating motion would have been obvious since Padgett teaches that it is well known and conventionally employed to provide such a motion on stimulating devices. Also Padgett teaches that it is known to provide a connection (14, 21) to receive "an auxiliary device for affecting the projecting member" such as allowing the projecting member to vibrate.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 10 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Barbour.

Barbour discloses a device having a housing having a slot(24), a motor(9), a linkage and projecting member (23 and 26) that extend through the slot. The motor provides a

reciprocating motion to the projecting member and a handle (27) which allows for the linkage and projecting member to pivot in the housing to change the orientation of the projecting member.

8. Claims 2, 4-7, 9, 11-12, 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Segal, Harvey, Garza and Boutos are cited to further show the state of the art.
